

The Siphon Valve by Fermtech Ltd.

Made in Canada

- Design allows “hands-off” filling.
- Stops when lifted.
- Perfect accompaniment for *The Auto-Siphon*.

The Auto-Siphon

Siphoning and bottling can be started with a single stroke!

The Siphon Valve

Hands-Off filling.
Lift to stop.

Hose

Use a 5/16" x 7/16" siphon hose.

Liquid Level

After filling, touch the valve pin to the inside of the bottle neck if less air space is desired.

Leaks

If the filler leaks, give the pin in the valve a few very firm tugs to reseal the pin.

Cleanliness

Sanitizing the Siphon Valve before and after each use is essential. Rinse with water and soak in any standard sanitizing solution for ½ hour.
